

A New Dawn in American Aerospace: Swētspot and Global Air Entertainment Inc. Forge Historic Partnership

Austin, Texas – January 6, 2025 – Swētspot, the epitome of American drone innovation and a cornerstone of The Marvina Case Family of Companies, announces a transformative alliance with Global Air Entertainment Inc. (GAE). This partnership marries GAE's groundbreaking HIRF scanning technology with Swētspot's unrivaled American manufacturing capabilities, marking a watershed moment in domestic aerospace advancement.

Forged in American Excellence

From its cutting-edge facilities in Austin, Texas, Swētspot—a crown jewel of The Marvina Case Family of Companies headquartered in Clearwater, Florida—has fundamentally reshaped the landscape of drone manufacturing. As a 100% American woman and minority-owned enterprise, Swētspot embodies the perfect synthesis of visionary leadership, technological innovation, and American manufacturing prowess.

The Swētspot Difference: Beyond Assembly

Each Swētspot drone represents a masterwork of American engineering, where every component—from quantum-grade sensors to advanced propulsion systems—is born of American ingenuity and crafted by American hands. This philosophy of total domestic production transcends conventional manufacturing; it stands as a testament to American technological sovereignty and innovation leadership.

Revolutionary Technology Integration

At the heart of this partnership lies GAE's revolutionary High-Intensity Radiated Field (HIRF) Scanning technology, exclusively licensed through Advanced Medical Solutions International LLC (AMSI). This integration catapults Swētspot's capabilities into unprecedented territory:

➡ Next-Generation Resource Discovery

- Quantum-enhanced subsurface mapping
- Revolutionary hydrocarbon detection systems
- Advanced water resource identification
- Real-time geological analysis and modeling

➡ Critical Infrastructure Protection

- AI-driven pipeline monitoring
- Predictive structural analysis

- Advanced materials stress testing
- Environmental impact forecasting

➡ **Advanced Security Solutions**

- Dynamic crowd behavior analysis
- Multi-band border protection systems
- Real-time tactical awareness
- Critical infrastructure defense

➡ **Humanitarian and Emergency Response**

- AI-powered search and rescue operations
- Precision disaster assessment
- Emergency response optimization
- Strategic aid deployment

A Vision of American Leadership

"Today marks more than a partnership—it heralds a new chapter in American aerospace dominance," proclaims Marvina Case, CEO of Swētspot and The Marvina Case Family of Companies. "From our headquarters in Austin, we're crafting more than drones; we're engineering America's technological future. Every component, from our quantum sensors to our proprietary propulsion systems, embodies our commitment to American excellence. By integrating GAE's revolutionary scanning technology, we're not just raising the bar—we're redefining what's possible in unmanned aerial systems."

Rodney D. Colley Sr., CEO of Global Air Entertainment Inc., adds, "In Swētspot, we've found a partner whose dedication to American manufacturing excellence matches our commitment to technological innovation. Together, we're not just advancing the industry—we're securing America's position at the forefront of aerospace technology."

Market Revolution and Strategic Impact

This alliance represents a quantum leap in American aerospace manufacturing, establishing new standards for domestic production and technological integration. The fusion of Swētspot's manufacturing excellence with GAE's proprietary technology enables:

- **Quantum Computing Integration**
- **Advanced AI Implementation**
- **Next-Generation Autonomous Systems**
- **Revolutionary Materials Science Applications**

About Swētspot

Based in Austin, Texas, Swētspot leads the vanguard of American drone innovation. As a flagship enterprise within The Marvina Case Family of Companies headquartered in Clearwater, Florida, Swētspot exemplifies the perfect union of technological brilliance and manufacturing excellence. Our identity as a 100% American woman and minority-owned enterprise underscores our commitment to fostering the only diversity that truly matters—diversity of thought—bridging the crucial gap between theoretical knowledge and real-world application in aerospace innovation.
